Iniziative ed Eventi

TORINO FASHION MATCH 2018: EVENTO B2B SETTORE FASHION E TESSILE Torino, 28 Giugno - 1 Luglio 2018

Durante la **Torino Fashion Week 2018** la rete Enterprise Europe Network (EEN) e il Sector Group Textile and Fashion organizzano l'evento internazionale di incontri bilaterali (b2b) Torino Fashion Match 2018 che offrirà ai partecipanti interessati l'occasione unica di incontrare potenziali partner commerciali e tecnologici provenienti da tutto il mondo e appartenenti ai seguenti settori:

- **Tessile/fashion: Abbigliamento accessori uomo- donna**
- **Sport wear/ street wear/ beach wear/ underwear**
- **Moda islamica**
- **Tessuti tecnici, tessuti intelligenti**
- **Servizi per industria tessile**

L'evento, organizzato da Unioncamere Piemonte e supportato da Finlombarda SpA, si svilupperà su 4 sessioni di b2b dal 28 Giugno al 1 Luglio 2018 presso il Lanificio di Torino ed è rivolto a:

- Aziende
- Fashion designer e start up
- rivenditori
- buyers
- start up
- società di e-commerce
- Centri di ricerca, Università e cluster internazionali per la creazione di consorzi al fine di aderire a progetti europei (bandi europei H2020) con aziende e istituzioni: sarà possibile incontrare tali enti SOLO nella sessione di b2b del 28 Giugno (giornata sport in collaborazione con EPSI)

I partecipanti al b2b potranno inoltre registrarsi ai **workshops** che coinvolgeranno relatori internazionali sui seguenti ambiti tematici:

- **Smart material, dispositivi indossabili e vestiti connessi: la nuova generazione del fashion technology**
- **Economia circolare e la sostenibilità nel settore fashion**
- **Aspetti legali e nuovi strumenti di retail per il settore fashion : come le nuove tecnologie influiscono sul blockchain dell'industria del fashion**
- **Contributi europei per le aziende settore fashion**

La partecipazione è gratuita previa registrazione dal sito: <https://torino-fashionmatch-2018.b2match.io/home>. La **scadenza per le iscrizioni** è fissata al **21 Giugno 2018**.

Face to Face Meetings @ ESOF 2018 Toulouse, 10 – 12 luglio 2018

La rete Enterprise Europe Network organizza un evento di brokeraggio nell'ambito di [ESOF 2018 \(Euroscience Open Forum\)](#) che si terrà a Toulouse dal 9 al 14 luglio 2018.

L'evento offre ad aziende, università e centri di ricerca l'opportunità di incontrare potenziali partner per progetti e collaborazioni future.

Il focus dell'evento di brokeraggio è dedicato al programma **Horizon2020**.

Per partecipare al brokerage occorre registrarsi sul sito: <https://face2face-esof2018.b2match.io/>

Si segnala che l'evento di brokeraggio è parte integrante di ESOF2018, per poter partecipare occorre quindi iscriversi anche al forum al seguente link:

<http://registration.esof.eu/>

dove sono indicati anche i costi di partecipazione.

Le scadenze previste sono:

6 luglio 2018: termine per la registrazione e la prenotazione degli incontri

10 – 11 – 12 luglio 2018: Matchmaking Event

Programma EU Business Avenues in South East Asia: Business Mission con supporto finanziario dell'Unione Europea

Il programma EU Business Avenues ha origine come iniziativa EU Gateway, che con oltre 25 anni di presenza sul mercato rappresenta la piattaforma leader per l'avvio di collaborazioni di successo tra le imprese europee e quelle del Sud-est asiatico.

Il nuovo programma, lanciato nel 2016, organizza "Business Mission" in Corea, Asia sud-orientale, Cina e Giappone. Le missioni imprenditoriali nel Sud-est asiatico iniziano sempre a Singapore e includono quindi una visita in un altro paese tra Indonesia, Malesia, Filippine, Thailandia e Vietnam.

Le imprese europee interessate a un contatto diretto con i paesi del Sud Est Asiatico tramite la presenza a fiere internazionali, la visita a sedi aziendali, la partecipazione a eventi di incontri B2B, possono presentare la propria candidatura per ottenere il supporto finanziario dell'Unione Europea alle seguenti missioni:

Business Mission	nazione	date	Deadline candidatura	Sito per informazioni
Green Energy Technologies	Indonesia & Singapore	28 ottobre 2018 - 1° novembre 2018	20/06/2018	www.eubusinessavenues.com
Construction & Building Technologies	Japan	18 novembre 2018 - 22 novembre 2018	27/07/2018	www.eu-gateway.eu

Il supporto finanziario dell'Unione Europea prevede:

- **hotel: fino a 1.000 € per sei notti nell'hotel previsto per la missione**
- **servizi personalizzati: fino a 1.000 € di copertura dell'80% dei costi dei servizi offerti.**

Meet in Italy for Life Sciences 2018 Bologna, 10 - 12 ottobre 2018

Finlombarda, coordinatore del consorzio SIMPLER promuove l'evento internazionale di **incontri B2B Meet in Italy for Life Sciences (MIT4LS2018)** organizzato dai partner della rete Enterprise Europe Network.

In sole 4 edizioni l'evento ha triplicato i suoi numeri: l'ultima edizione ha visto **oltre 350 partecipanti (31% esteri, oltre 120 startup)** dare luogo a **2000 incontri (56% transnazionali)** per un totale di 31 paesi coinvolti e 90.000 visualizzazioni dei profili (<https://www.b2match.eu/mit4ls2017>).

L'evento quest'anno si terrà a Bologna dal 10 al 12 Ottobre 2018 e sarà incentrato sui seguenti focus:

- **dispositivi medici**
- **farmaceutico e biotech**
- **ICT per la salute**
- **nutraceutico**
- **filiera correlata**

L'evento è un'opportunità per farsi conoscere e trovare partnership nazionali ed internazionali di natura commerciale, di ricerca e sviluppo, trasferimento tecnologico, per progetti europei, per investimenti ed è rivolto a:

- **imprese**
- **start-up**
- **organizzazioni di ricerca pubblica e privata**
- **investitori**
- **cluster, agenzie per l'innovazione, organizzazioni di settore**

Inoltre il **10 e 11 ottobre** ci saranno **workshop tematici** e i **pitch dell'IHVF – Italian Healthcare Venture Forum 2018**, un'iniziativa per supportare la crescita delle startup.

Il **12 ottobre** ci sarà la **conferenza internazionale** conclusiva dell'evento **"Digital Transformation in medicine: average is dead!"**

Tutti i dettagli su <http://meetitalylifesciences.eu/>

Per ulteriori dettagli e per iscriversi all'evento: <https://meetitalylifesciences.eu/iscrizioni/>

Finlombarda è a disposizione delle imprese lombarde per fornire chiarimenti riguardo agli eventi e per offrire il proprio supporto nelle fasi di registrazione e partecipazione agli incontri B2B. Per informazioni scrivere a: simpler2@finlombarda.it

Bandi e altre opportunità dall'Unione Europea

Marie Skłodowska Curie Actions (MSCA): un contributo alle imprese per ospitare ricercatori esperti

Il programma Marie Skłodowska Curie Actions (MSCA) – Individual Fellowship, nell'ambito di Horizon 2020, finanzia la **mobilità intersettoriale dei ricercatori post dottorato** (oppure che hanno almeno quattro anni di esperienza nella ricerca a tempo pieno), che vogliono sviluppare progetti di ricerca in Paesi e settori diversi con lo scopo di acquisire nuove competenze.

Una delle novità più recenti del Programma, rispetto al passato, è l'introduzione del panel multidisciplinare **"Society and Enterprise Panel"** che permette ai ricercatori di presentare un progetto di ricerca e formazione presso un'organizzazione del settore non accademico, in uno Stato membro o Paese associato.

Le organizzazioni che possono ospitare i ricercatori **non sono soltanto gli enti accademici** (università e Centri di Ricerca), **ma anche le PMI, le organizzazioni internazionali, gli enti governativi, le associazioni culturali, i musei, gli ospedali, etc.**

Una novità di rilievo che permetterà, soprattutto alle nostre imprese, di beneficiare della collaborazione di un ricercatore altamente qualificato che, con il supporto di personale aziendale esperto, contribuirà a creare un punto di incontro tra esigenze industriali e accademiche.

Le **borse di studio individuali** hanno una **durata di 12/24 mesi** e coprono il 100% dei costi sostenuti per l'intero periodo. Il contributo fornisce un'indennità per il salario, i costi di viaggio e i familiari del ricercatore. In aggiunta il contributo copre i costi di ricerca, di formazione e di networking del ricercatore, i costi di gestione e i costi indiretti del progetto.

I ricercatori dovranno rispettare il criterio della mobilità, cioè non essere stati nel paese di destinazione per più di 12 mesi nei 3 anni precedenti la scadenza della call.

Le proposte progettuali, che verranno valutate da esperti internazionali sulla base dei criteri di eccellenza, impatto e qualità ed efficienza dell'implementazione del progetto, potranno essere presentate **fino al 12 settembre 2018** attraverso il Participant Portal:

<http://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/msca-if-2018.html>

Finlombarda, nell'ambito delle attività del progetto Simpler, offre supporto alle imprese per individuare profili di ricercatori e, al tempo stesso, può facilitare il contatto tra i ricercatori italiani ed imprese europee interessate.

Ricerche Partner per programma Marie Skłodowska Curie Actions (MSCA)

1) Title	H2020-MSCA-IF-2018: Researcher needed for the development of novel methodologies for analysis and design of steel and timber joints
POD Reference	RDES20180524001
Summary	A research group of a university located in the North of Spain seeks a researcher to be candidate for HORIZON 2020 – MSCA / Individual Fellowships (H2020-MSCA-IF-2018). She/he will be asked to prepare a proposal aimed at developing a novel methodology for analysis of 2D joints based on advanced computational techniques and metamodels, which will exceed the accuracy and reliability of both the component and semi-empirical methods currently in use.
Deadline for Call	12 Sep 2018

2) Title	H2020-MSCA-IF-2018: Researcher needed for analysing the link between Alzheimer's disease and obesity
POD Reference	RDES20180524002
Summary	A research group of a university located in the north of Spain is looking for researchers in the area of neurosciences and/or obesity and metabolism within the framework of the Marie Skłodowska-Curie Actions - Individual Fellowships (H2020-MSCA-IF-2018) programme. The researcher will have to study the plausible link between metabolic disturbances (obesity and insulin resistance) and Alzheimer's disease.
Deadline for Call	12 Sep 2018

3) Title	H2020 / MSCA / Individual Fellowships: researcher (MD or PHD) in biomedicine / biotechnology with technical skills for the development of a mini mobile laboratory to perform toxicological testing of substances, chemicals, ingredients, etc. on site
POD Reference	RDDE20180220001
Summary	A small German precision engineering company seeks a researcher to be funded by HORIZON 2020 – MSCA / "Society and Enterprise Panel". The objective of the innovation project is to develop a mobile mini-laboratory for toxicology testing of biological substances, chemicals as well as ingredients of cosmetics and pharmaceuticals on human samples. Applicants must hold a MD or PhD in biomedicine / biotechnology and have technical skills related to device development and tool building.
Deadline for Call	12 Sep 2018

4) Title	H2020-MSCA-IF-2018: Researcher needed for the development of disruptive solutions in the integration of building services and energy systems in architecture and urbanism
POD Reference	RDES20180524003
Summary	A research group of a university located in the North of Spain seeks a researcher to be candidate for HORIZON 2020 – MSCA / Individual Fellowships (H2020-MSCA-IF-2018). They are looking for a motivated candidate who wishes to develop alternative and/or disruptive solutions in the integration of building services and energy systems in architecture and urbanism (theoretical and/or practical developments).
Deadline for Call	12 Sep 2018

5) Title	Horizon 2020/ MSCA: Researcher in optoelectronics /photonic sought
POD Reference	RDDE20180509001
Summary	A German precision engineering company is looking for a researcher in optoelectronics/ photonic with technical skills for the development of remote sensing devices to detect the speed of particles and objects based on the companies patented core technology. The aim is to commonly apply for a MSCA Individual Fellowship grant under Horizon 2020 (MSCA-IF-2018).
Deadline for Call	12 Sep 2018

Invito a presentare manifestazione di interesse per
Servizi a supporto dell'innovazione in impresa – Progetto KAMINLER

Nell'ambito del progetto KAMINLER, finanziato da Horizon 2020, Finlombarda S.p.A. offre a piccole e medie imprese lombarde innovative **servizi gratuiti di accompagnamento al miglioramento e valorizzazione delle proprie capacità di gestione dell'innovazione**. Alle PMI selezionate, verrà fornita consulenza specialistica per l'individuazione dei fabbisogni di innovazione e per la pianificazione delle azioni da intraprendere allo scopo di migliorare la capacità di gestione dell'innovazione.

Il servizio prevede:

- Incontro con l'impresa volto a individuare i fabbisogni di innovazione tramite un'analisi approfondita;
- Elaborazione delle informazioni acquisite e restituzione all'impresa dei gap di innovazione individuati;
- Definizione di un piano d'azione finalizzato al superamento degli ostacoli individuati;
- Supporto alla realizzazione degli interventi correttivi e monitoraggio dei risultati.

Le aziende interessate potranno manifestare il proprio interesse ad usufruire del servizio inviando [l'apposito modulo](#) compilato all'indirizzo simpler2@finlombarda.it specificando nell'oggetto "**Manifestazione di interesse al Servizio di supporto all'innovazione**".

Saranno prese in considerazione le domande pervenute che rispondano ai requisiti specificati nel modulo.

Ricerche Partner per Bandi Europei

Fonte: ENTERPRISE EUROPE NETWORK

1) Title	H2020-SC1-BHC-10-2019: public procurers and experts in Next Generation Sequencing, genomics, ethics and data protection are sought for routine diagnosis in haematology and oncology
POD Reference	RDES20180510001
Summary	A Spanish public hospital is looking for partners for submitting a proposal to the call H2020-SC1-BHC-10-2019: Innovation Procurement: Next Generation Sequencing (NGS) for routine diagnosis. Public procurers and experts in NGS, genomics, ethics and data protection in the field of haematology and oncology are sought for developing personalised medicine solutions and scale-up demand driven innovation for healthcare systems.
Deadline for Call	16 Apr 2019

2) Title	UK-based SME and UK-based university seek partners for proposal to H2020: LC-SC3-NZE-1-2018 Advanced CO2 capture technologies
POD Reference	RDUK20180427001
Summary	A UK-based SME and UK-based university have developed a novel carbon capture and storage process. They are looking to develop the concept to demonstrator / pilot stage and are submitting a proposal to the LC-SC3-NZE-1-2018: Advanced CO2 capture technologies call topic in Horizon 2020. They are looking for consortium partners with expertise in industrial refrigeration, mechanical handling and process control design and implementation under a research cooperation agreement.
Deadline for Call	06 Sep 2018

3) Title	H2020-SC3-RES-1-2019 : Companies with expertise in photovoltaics fabrication, power device, sensors are sought
POD Reference	RDFR20180219001
Summary	A French university will act as a coordinator of a European project aimed at developing new approaches for the fabrication of power devices. The consortium has identified 2 relevant calls to implement this project : LC-SC3-RES-1-2019 and LC-NMNP-32-2019. Industrial partners active in semiconductor electronics/sensor/photovoltaic (PV) are sought to complete the consortium.
Deadline for Call	16 Oct 2018

4) Title	H2020 Call Security - Enhance urban train stations & users security with innovative solutions (pre-commercial procurement scheme). End users and buyers are requested.
POD	RDFR20180411001

Reference	
Summary	A French regional government is leading a project proposal on H2020 Security topic with a joint pre-commercial procurement (PCP) scheme. The project aims to enhance urban train stations security with innovative solutions. The region is working with the French national railway company and they are looking for buyers and end-user organisations from 3 EU countries active in the passenger railways sector and interested in co-financing R&D projects addressing the security challenges.
Deadline for Call	19 Feb 2019

5) Title	H2020 SU-INFRA01-2018-2019-2020 A Greek Transmission System Operator (TSO) is searching for other TSO partners notably interested in the field of prevention,detection,response and mitigation of combined physical and cyber threats to critical infrastructure
POD Reference	RDGR20180508001
Summary	A Greek Transmission System Operator (TSO) has been setting up a consortium to answer H2020 SU-INFRA01-2018-2019-2020 call. The company is searching for other TSO companies under a research partnership agreement, aiming to develop an installation specific approach that will address all critical factors needed to secure existing or future, public or private, connected and interdependent power and distribution installations, plants and systems
Deadline for Call	23 Aug 2018

6) Title	H2020 CE-SFS-24-2019 - Innovative and attractive French metropolis is searching partners notably interested in the field of sustainable alimentary supply for setting up novel urban food-chains
POD Reference	RDFR20180307001
Summary	An innovative and attractive French public institution for inter-municipal cooperation is looking for a coordinator and other partners to answer Horizon 2020 CE-SFS-24-2019 call. The institution is searching municipalities or equal structures being experienced and applying novel practices in the domain of sustainable food-chains and food-systems. The scope of the project is to set-up an universally implementable model of an innovative, inclusive and sustainable food-system for cities.
Deadline for Call	23 Jan 2019

7) Title	UK SME seeks partners for proposal to Innovate UK Open Round 5 or 6, to develop a high-efficiency uncooled combustion engine
POD Reference	RDUK20180411002
Summary	UK London based SME is developing uncooled internal combustion engines (ICEs) for all hybrid applications and fuels, including hydrogen. The piston/cylinder assembly is being manufactured from structural ceramics. Around one third of fuel energy is currently dissipated in cooling systems - this waste is eliminated. Partners are sought with experience in fuel delivery systems, ceramic materials, turbocharging and exhaust energy recovery for an application to Innovate UK Open Round 5 or 6.
Deadline for Call	09 Sep 2018

8) Title	H2020 – Spanish University requires a company producing lignin waste, a company using bio-based aromatics as input and a research team with technological expertise on lignin, to develop new technologies to obtain new aromatic building blocks from lignin.
POD Reference	RDES20180507001
Summary	Leading Chemistry Department of a Spanish University requires industrial partners and research

	teams to develop photochemical and electrochemical technologies to obtain new aromatic building blocks from lignin. Project aim is to add value to industrial waste (lignin) by developing new, sustainable and cost-effective synthetic routes to produce lignin-based aromatic building blocks used in several industries (chemical, pharmaceutical, cosmetics, polymer, agrofood...) under H2020 BBI-2018-S03-R11.
Deadline for Call	06 Sep 2018

simpler2@finlombarda.it

Ricerche di Partner Tecnologici e Commerciali

Richieste di tecnologia

1) Title	French company is looking for sustainable flexible waterproof materials for outdoor sport equipment
POD Reference	TRFR20180420001
Summary	A large French company specialized in outdoor sport equipment is looking for sustainable flexible waterproof materials which can be used in his field, to reduce environmental impact of his product. The product must have a laboratory proof of concept, and could be recently marketed. The company is looking for a license agreement or a technical cooperation.

2) Title	French SME laying outdoor cast soft floor mats is looking for ecological binding agents
POD Reference	TRFR20180515001
Summary	A French SME designing and manufacturing outdoor children and sports playgrounds made of soft cast floor mats is looking for ecological binding components as substitute to currently used petrochemical binding agents. The company is interested in finding partners for a commercial agreement with technical assistance.

3) Title	A Lithuanian SME is looking for a natural plant extracting technology
POD Reference	TRLT20180313001
Summary	Based in Lithuania, the SME is expanding its business adding a new specialization to their profile - production of dry plant and fruit extracts using supercritical carbon dioxide method. The company is looking for a technology and/or equipment company, for a collaboration opportunity under the commercial with technical assistance, joint venture agreement or service agreement.

4) Title	Call for startups providing innovative water filtration solutions
POD Reference	TRLU20180502001
Summary	A worldwide steel & iron industrial company based in Luxembourg is looking for startups having developed validated proof-of-concept water filtration solutions able to remove a high proportion of fine slag sand particles from process water. The Luxembourg company offers the successful candidate the possibility to accelerate product development and market access, through technical cooperation agreement. Deadline for applications is May 31st, 2018.

5) Title	Audiovisual company is seeking for a technical partner with expertise in software development for robotic cameras
POD Reference	TRES20180417001

Summary	German-Spanish SME with extensive expertise in the audiovisual market is looking for a technical partner in order to collaborate in the development of a new product for the production of audiovisual events using robotic cameras. The type of agreement sought is technical cooperation. The partner should have experience with software development for applications sending and receiving data to and from robotic cameras.
---------	---

6) Title	UK-based SME requests technical expertise to explore the synergy found in its antibody drug conjugate technology under research cooperation or technical cooperation agreements
POD Reference	TRUK20180416003
Summary	A UK-based SME is developing a novel antibody drug conjugate technology for treating cancer. Their technology targets two cancer cell markers rather than one, preventing non-specific targeting of healthy cells. During development this dual target approach showed potent synergy compared with targeting individual markers. The SME would like to investigate the mechanisms of this with universities and research institutions under research cooperation agreements or technical cooperation agreements.

Offerte di tecnologia

1) Title	An EU-funded regional project is looking for companies in the European Union that would like free access to research institutes in the Baltics
POD Reference	TOSE20180419001
Summary	An EU-funded regional project is looking for companies in the European Union that would be interested in entering a service agreement with research institutes in the Baltics. The companies would get free access to test their ideas, products or processes in state-of-the art facilities as part of a regional project that wants to strengthen the relationship between research and industrial needs.

2) Title	UK-based SME offers novel small molecule anti-fibrotic therapeutic
POD Reference	TOUK20180413001
Summary	A UK-based SME has developed a novel small molecule that inhibits a cell signalling pathway that has a role in fibrosis. This molecule has shown potent efficacy combined with a good safety profile. The company is offering this molecule to other companies in the pharmaceutical space, especially those interested in fibrosis, for further development and commercialisation. It is envisaged that the partnership will take the form of a licensing agreement or a technical cooperation.

3) Title	Established Slovak research institute has developed an exceptional nanomaterial with unique photofunctionality applicable e.g. in photochemistry. The institute is looking for investors or companies interested in manufacturing of the nanomaterial
POD Reference	TOSK20180509001
Summary	Slovak institute has developed an exceptional nanomaterial with unique photofunctionality. Hybrid inorganic-organic supramolecular systems composed of photoactive luminescent dye molecules embedded in a layered structure of nanomaterials exhibit attractive features, such as emission, absorption and nonlinear optical properties. The institute is looking for partners to cooperate with via financial agreement, manufacturing agreement or via services agreement.

4) Title	A French SME is looking for distributors/integrators for real time solution to manage temperature tracking of sensitive products
POD Reference	TOFR20180424001
Summary	A French technology-based SME, expert in electronic devices and software development, has developed a real time non intrusive solution for temperature tracking of not only medicine boxes but also every kind of sensitive products. The company looks for distributors/integrators of medical related products for Clinical Research Organizations (CRO) to integrate the software part

	into the management system of the CRO. Technical cooperation is sought, and also research cooperation if possible.
--	--

5) Title	A German engineering company offers expertise to optimise rubber and plastic production processes
POD Reference	TODE20180320001
Summary	A German engineering company with more than 30 years experience in injection-moulding production processes for rubber and plastic parts offers in-depth know-how and expertise to optimise injection-moulding production processes for rubber and plastic parts. The company offers technical cooperation agreements with plastic and rubber parts manufacturing companies for the development of tailored and efficient production processes.

6) Title	Dutch company offers technology for handheld device for measuring the tension in pre-stressed cables
POD Reference	TONL20180305001
Summary	A Dutch company offers an efficient technology to measure tension in pre-stressed cables contactless that can be used primarily in the concrete industry to improve efficiency. The method consists of several components that are ready for demonstration. The company is looking for a company interested to bring this technology to the market, there is a market demand for the system. The proposed type of collaboration is a commercial agreement with technical assistance.

Offerte e richieste di collaborazioni commerciali

Presentiamo di seguito alcuni profili di ricerca/offerta di collaborazioni commerciali di recente inserimento nella banca dati di Enterprise Europe Network:

1) Title	Dutch distributor in the outdoor-sports market wants to extend his portfolio and is looking for innovative quality products, excluding clothing
POD Reference	BRNL20180410001
Summary	This Dutch company is looking for innovative quality products, which make outdoor-sports easier or more enjoyable. Products should be applicable to skiing, snowboarding, hiking, camping, mountain-biking or race-biking, but not being clothing. The company offers to introduce branded products on the Dutch and Belgium markets via its established network of retailers and e-commerce. The company would like to collaborate in the frame of a distribution services agreement.

2) Title	UK manufacturer of secure outside metal storage units seeks production partner
POD Reference	BRUK20180427001
	Public Link
Summary	The UK company manufactures both office furniture and a range of secure outside metal storage units. In order to extend the markets for the storage range, the firm is seeking partners to manufacture this product within their own facilities, in order to sell them into their own market. Manufacturing, licence or joint venture agreements would be the ideal, but the UK firm would also consider subcontracting.

3) Title	German online-shop is looking for products for home care, mobility, rehabilitation, diabetes and anti-decubitus for distribution agreement
POD Reference	BRDE20180427001
	Public Link
Summary	A German SME specialised in products for home care is looking to expand its portfolio with products for home care, mobility aids, rehabilitation, diabetes, anti-decubitus and other connected products. The SME is running a B2C webshop in order to market these kind of products. The company is looking for distribution services agreement.

4) Title	Turkish medical company seeks coagulation and ablation device distributors
POD Reference	BRTR20180327001
Summary	A large Turkish company supplying innovative solutions to hospitals is looking for suppliers of coagulation and ablation devices with CE certification. They are looking for new suppliers through either distributorship or commercial agency agreement.

5) Title	The Polish company of innovative LED system solutions is looking for the manufacturing agreement
POD Reference	BRPL20180413002
Summary	A Polish company with a good experience specializes in the production of innovative LED lights for the restaurants, bus stations, bars and other public areas. The company is looking for a manufacturer or supplier of specific aluminum profiles and led lamps. The company offers manufacturing agreement to potential business partners from the European country for a competitive price with innovative design.

6) Title	Spanish company offers its distribution services for single use material and HORECA products
POD Reference	BRES20180410002
Summary	The Spanish company is interested in single use material and HoReCa products to distribute them in their territory (see below) and they are searching for suppliers in European countries, Asia (in particular India), but they are also open to business offers from other countries.
